A: It is a new look for after effects scripts. i am user since final cut 7 and i hate when new type of scripts come. They don't work and their name is: "XML based script". So i look at their history and i see only 3 scripts in after effects history. I need more history. So i decide to create a html page with all the scripts that i know work in after effects for all users. I've made a web page with only working scripts. i have actually 6 scripts on it. It takes about 20 minutes to create but i think it is better and can save many users time. Why i have made this page? Every script need a lot of lines of code to do what they are supposed to do and a lot of after effects users don't know that they can do the same using only one line of code. This are the reasons for my idea. How can I get the scripts? i have created a link to a group called free after effects scripts. I didn't do it officially, i am just a regular user. You can find it here: This group is for only free scripts because i hate non-free scripts. How can you get it? Don't know. You just have to type it on google or type it on the link that i've given.
