I'm working with my teacher at a class and we use Sharea to transfer files and folders between PCs. One of the things that is making it work so well is that we have two computers in the room with the same exact settings and you can transfer from one PC to the other via the panel of the other PC, and vice-versa. The file transfer speed is also very fast and it works like a charm! The only thing I can think of that is a drawback to Sharea is the fact that you cannot share the same file with two computers at the same time. Still, if I only needed to share one file for now, then I would definitely recommend this software, and I'm sure my teacher and I will be very happy with it! Thanks for making this software available for us to use! by Marios11/01/2016 Rating Simple enough. Fast & easy. by Tina 12/29/2015 Rating Simple and easy to use. Only downside is that you can only share a specific file or folder. by Kaptone30/02/2016 Rating I have used this program for a couple of years now. I think the interface is simple and smooth. I have tried other software but this is the most
