## Intel-SA-00086 Detection Tool

### What's New in the?

Version: 02/2018.2 Description: For computers running an affected firmware version: CPUA - Microcode Version <INSERT CORRECT MICROCODE REVISION>.0700 <INSERT MICROCODE VERSION FROM TABLE B> <INSERT TABLENAME> CPUB - Microcode Version <INSERT CORRECT MICROCODE REVISION>.0800 <INSERT MICROCODE VERSION FROM TABLE B> <INSERT TABLENAME> CPUC - Microcode Version <INSERT CORRECT MICROCODE REVISION>.0900 <INSERT MICROCODE VERSION FROM TABLE B> <INSERT TABLENAME> <END OF MICROCODE REVISION FOR ALL NOS.> Notes: - This tool is intended to provide guidance to consumers and system integrators who are interested in applying current security best practices to safeguard their products from the risk of becoming affected by Intel-SA-00086. - A firmware update is available to address this issue. Please see < - The latest version of the firmware update is available. Please visit < - For more information about Intel-SA-00086, please visit < To add to the discussion of this thread, I have had the same problem with my PC that was HP's latest update of their BIOS. I went in a few days ago and read in the BIOS section of the release notes that a version that included updates for the Intel Management Engine was included with this release. I don't think I have ever seen a version of the BIOS which was affected by Intel's Management Engine before. I also have several versions of Intel (i7) CPUs. The newest one is Intel Core i7-8550U but I have two others that are Intel Core i7-7700HQ and Intel Core i7-6700HQ that were introduced in 2017 and 2016 respectively. Note You need to log in before you can comment on or make changes to this bug.Q: Acceptance of Dates in While-Loop I
