Inline documentation is available from the Class Browser for the DrawingObject class. History AutoCAD LT originally implemented a visual programming language named LISP. LISP was in turn modeled after SmallTalk. LISP became the scripting language for AutoCAD LT, and AutoCAD was originally released as AutoCAD LT 1.0. Although LISP was replaced by Visual LISP (VLISP), AutoCAD LT 2.0 and later still support LISP as a scripting language. In addition to using LISP for scripting, LISP also forms the foundation for adding new features to AutoCAD. This also includes programming in LISP for automation. AutoCAD 2010 introduced the Python scripting language, as well as Visual Basic. Python became a standard scripting language for AutoCAD. VB was replaced by Visual Studio.NET. AutoCAD 2011 introduced support for the .NET Framework as well as the ObjectARX automation runtime environment. The former enables users to create COM add-ons in .NET. The latter allows writing AutoCAD automation scripts in C++. AutoCAD 2012 introduced support for the Visual Studio.NET programming environment. This adds

the support of other programming languages besides Python and .NET. AutoCAD 2013 introduced the ObjectARX automation runtime environment, and Windows Phone Runtime as well. It also introduced the new Map and C# programming languages. AutoCAD 2014 introduced the new programming language R, as well as the RIDE Automation Runtime Environment. AutoCAD 2015 introduced the new programming language Visual Basic. AutoCAD 2016 introduced the new programming language Visual Basic for Applications (VBA), which is a compatibility layer for VB 6.0. It introduced a new Visual Interface. AutoCAD 2018 introduced the new programming language AutoLISP and the Class Browser, a feature to easily browse classes in AutoCAD's native programming language. It was also discontinued. AutoCAD 2019 introduced the new programming language ObjectARX and the Class Browser, which is a feature to easily browse classes in AutoCAD's native programming language. It was also discontinued.
