orter Ever since I got my first raspberry pi I've been wanting to get some sort of device to learn C#. My goals are to get better at coding, so I've been trying to expand my horizons outside of the scope I already know. Sure I can learn by reading books, but I can read faster than I can write code. So I decided to start trying and get as deep as I can. I started with asprin (effectively a clone of C#), then I used F# (also a functional programming language) and I've now been working on my way to learning on C#. One of the things I love most about learning C# is that I can develop an application on the Pi with Node and deploy it on my Raspberry Pi 2. This is a hell of a lot faster than using Visual Studio. Also, being able to run the application on my RPi while still having the full power of a full desktop with my Windows machine would be a sweet treat. I don't plan on using Windows 7 ever again and if I can move from it into Linux I would be able to grab all the benefits of not having a Windows machine. And for Windows users learning on RPi? You still should use Raspbian. Raspbian is a pretty easy to use Ubuntu-based distribution and is much better suited for home and public desktops. I've been wanting to try out ChocoPixel Sorter for a long time. It runs fine on Raspberry Pi, has templates built in and in fact, now that I've used it, I think it'd make an awesome work-group tool. For those who don't want to track down a chunk of time and \$ to set up a C# PC for work and for learning C#, here's your solution: Choco Pixel Sorter - offline cheat-sheet of all the things you want to know Oh, and in case you were wondering... I got Yesenia, Yehuda and Ofta to experiment with the project and see what we can do. My next goal with learning C# on the Raspberry Pi will be to build a mixer.U.N. nuclear agency confirms Iran meeting Washington: The United Nations Nuclear Agency has said that there was evidence of an Iranian Revolutionary Guards officers-related unit meeting at a 'secret location' in the latest reported covert activity by Tehran in the wake of the ongoing intensification of negotiations between Iran and

Garden Story is a story-driven puzzle adventure featuring a kind-hearted girl and a garden full of curious robots who need your help. Set in a beautiful world, to the rhythm of a musical soundtrack, and with unlockable content and a day-night cycle, Garden Story offers a unique, puzzle-driven experience. Garden Story has received positive reviews and top scores of over 83% on Steam. Key Features:

- A unique puzzle-driven adventure with a variety of endings
- A day-night cycle featuring a musical soundtrack
- A variety of puzzle-solving mechanics including the story-based Grove Quest and puzzle-game puzzles in the augmented reality mode
- An original, music-driven soundtrack by Graham Nesbitt

Garden Story is published by LittleRad Games on Windows PC, PlayStation 4 and Nintendo Switch. Since its release in October, Grand Theft Auto V has been the subject of popular culture and is the oldest game in the series to be released with HDR support. GTA 5 is the story of three protagonists who were children when the events depicted in the game took place. One of these characters, Michael, was the caretaker to his brother, Franklin, and friend, Trevor, who was the leader of the local gang who tormented Franklin. Michael's character received a great deal of inspiration from actor, Sean Mercer, who portrayed Michael alongside his brother Sean in the 1993 film adaptation of the novel, American Born Chinese, which has an age gap of ten years between the two characters. Mercer has described the production of the film as "unnerving". The film's soundtrack, composed by Brad Fiedel, has also had a large influence on the music in the game. The game's original score was performed by composer Antonín Dvořák. Grand Theft Auto V sold over 65 million copies as of May 2015, and was, at the time, the best-selling video game of all time. Gameplay Grand Theft Auto V puts the player into control of Michael, a young teenager. This is the second installment of the Grand Theft Auto series to feature a main character that is significantly younger than his alter-ego. In the vein of Max Payne, Michael is an explosive, one-man-army. The game's primary multiplayer mode, Grand Theft Auto Online, allows the player to create up to eight online characters, each with their own attributes. Completing missions allows players
