Some of the images are clearly inappropriate. One picture is a photo of Apple CEO Steve Job's face as a doll . Another image of a crinoline on a woman's skirt shows off the swathing, industry-influencing gown in service of a particularly popular 19th century fashion fad. - **GPU compositing:** GPU compositing is a way to make images on one layer composited using a GPU, allowing the software to run faster than with a CPU (just like the changes in CPU and GPU cores).
- **Automatic Lens Blur:** Photoshop Lens Blur has always used the CPU to process its blur features. In future releases, Lens Blur will be processed with the GPU. This change offers significant performance and reliability benefits to users who enable Lens Blur in Photoshop.
