some reason I couldn't import my account from the iOS version to
the PC version. I don't know why. I didn't keep any important
information in the PC version. :/ I just have my account name,
picture, and select my preferred weapons. I transferred all of it
and that was it. If you want my account for the PC version, let me
know. I had to redo all of my progress in my Top Gun game,
because I lost the character from the iOS version of the game. To
lose progress in the PC version of the game you have to redo all
your missions. No autosave or anything, you have to redo it all.
I'm trying to work out if there's a copy protection on Top Gun that
I somehow lost or missed when I transferred from iOS to PC. If
someone could help me out with this I'd greatly appreciate it.
Imported my account from the iOS version of the game to the PC
version but the Top Gun game still doesn't allow me to play in iOS
mode. I'm confused as why iOS mode isn't allowed in the game.
The iOS version and PC version are the same and the character
names were copied over, too. Is there something on the PC
version that I need to do? I'm having a lot of trouble figuring out
how to unlock levels or missions. First, this is a very good game
and I love it so far. I'm having a hard time figuring out how to
finish all of the missions in the game. To unlock one mission you
need to level up and to level up you
