Quinn had to be reprogrammed after the last launch. This happened due to an error in the generator circuitry. A smaller, simpler, more stable DC generator was designed to work with the old version of the board. Software After the commissioning and the validation tests were performed, the Quad was shipped to Georgia to Themis for integration with the station. The entire crew had to be rescheduled due to an ear infection. The plan was to have the entire crew start in mid-May, but due to bad weather they couldn't fly until the 6th of June. The Quad was configured on July 3rd. The payload was completed on August 16th. The board was test on August 23rd. The ground station was launched at 09:34 AM on September 12th. On November 30th, a successful soft-landing was made. The Quad was lifted off the pad again on February 5th, and was re-launched on February 7th. The first commissioning flight for the flight software was on February 10th. On the second commissioning flight, the crew changed. Cameron Smith was assigned as the pilot, and Alexander Kizenko became the mission commander. Quad Software Flight Software was named "P2" and the name is no longer used since the station is named "P1". The mission lasted a total of 5 days, 16 hours and 23 minutes, with a total time of 101 minutes of the total mission time.
