AutoCAD tutorials are written with a novice user in mind. No prior knowledge of AutoCAD is assumed. Create and publish tables and plots To create a table, open the Table Editor window. The Table Editor window is found in the Tables panel. The Table Editor window displays a document that contains a drawing area. To create a table, click a drawing area. The cursor changes to a plus sign and the Table Editor window is activated. Drag the cursor to place a row. As you drag, the Table Editor window displays a new row and moves the previous row down. To create a table that contains a title, click a drawing area to activate the Table Editor window. In the Table Editor window, type a table title in the Table Title field. Select a drawing area for the table. (You can select only one area at a time.) To create a table that contains a title, click the Drawing List or the

Drawing List view tab in the Table Editor window. In the Drawing List view, click a drawing area to activate the Table Editor window. In the Table Editor window, type a table title in the Table Title field. To create a table that contains a title, click a drawing area. In the Table Editor window, type a table title in the Table Title field. In the Drawing List view, right-click any selected area and select Table to open the Table Editor window. Type a table title in the Table Title field. To publish a table, drag a drawing area, hold down the Shift key, and drag. The Table Editor window displays a dialog box with a Publish dialog box. In the Publish dialog box, select a file format, publication area, and publication settings. After you have selected these settings, you can publish the table.

AutoCAD

There are many template-based plug-ins which contain a basic set of tools used in the creation of a drawing. Autodesk supports the Autodesk Exchange App Repository, providing a means for sharing and distributing Autodesk Exchange App templates. The AutoCAD API allows external programs to embed a small portion of AutoCAD code, allowing 3rd party apps and tools to function as part of the AutoCAD environment. This API was made available with AutoCAD 2013. The System Reference Guide for the API is available online and in the AutoCAD 2015 Interactive Guides for programmers and AutoLISP and Visual LISP programmers. The Command AutoLISP API allows AutoLISP code to be run as if it were part of the interface or command. AutoLISP code can be embedded in Python, Java, VBA and AutoCAD, and written in any language that supports the cross-language compiler for AutoLISP. Autodesk offers the ability to "Power up" CAD components with code. This allows a programmer to use visual LISP code to enhance the functionality of a CAD component. Visual LISP code can be used to enhance the functionality of a CAD component in both Autodesk Exchange Apps and plugin-based AutoCAD add-ons. Some of the more well known AutoCAD add-ons include: Autodesk Exchange Apps AutoCAD Architecture AutoCAD Electrical AutoCAD Civil 3D AutoCAD FEA AutoCAD Mechanical AutoCAD Mechanical 3D AutoCAD Navigator AutoCAD PipeHaul AutoCAD PipeHaul Add-on AutoCAD Structural Analysis AutoCAD Template Builder AutoCAD Templates for
