May 8, 2019 - Descenders is a freeride game developed by RageSquid and published by No More Robots. At first, you might think that this is fair. When you first launch the game, you will have to ski down a slope, pass through several mountain ranges, which are mountains, forests, glaciers, beaches - all surrounded by impressive views. Then the first level begins, where you have to ski down the slope, but before that you will have to choose what exactly you will do. You can go skiing only, snowboarding only, or you can choose both. And then the fun begins.
