there's no better time to get in on the ground-breaking action than right now, as the game is on sale for a huge discount on ps4 and xbox one. both versions of rocket league are available for \$20 until july 1, 2017, so get in on the ground-breaking action now. rocket league is the perfect game to play with your friends over the summer holidays, and for those who want to get in on the ground-breaking action now, the game is on sale for a huge discount on ps4 and xbox one.

both versions of rocket league are available for \$20 until july 1, 2017, so get in on the ground-breaking action now. rocket league is a vehicular soccer video game developed and published by psyonix. rocket leagues gameplay is largely the same as that of its predecessor, supersonic acrobatic rocket-powered battle-cars. players control a rocket-powered car and use it to hit a ball that is much larger than the cars towards the other teams goal area to score goals, in a way that resembles a soccer game, with elements reminiscent of a demolition derby. players cars have the ability to jump to hit the ball while in mid-air. the players can also pick up a speed boost by passing their cars over marked spaces on the field, enabling them to quickly cross the field, use the added momentum to hit the ball, or ram into another players car to destroy it; in the latter case, the

destroyed car respawns moments later. a player may also use a boost when in the air to propel themselves forward in flight, allowing players to hit the ball in the air. you dont just get any old game when you play rocket league. your ride comes with unique decals, wheels, paints, and even helmets. thats why were here, to provide you with the best rocket league decals and helmets. each decal and helmet features a special, unique pattern and are designed to reflect the look of your ride. they look great on any car and add a unique, custom look to your ride.

Rocket League supports multiclipping, allowing you to play split-screen multiplayer with three other friends. This can be useful for quick rounds with a friend or a double elimination tournament with some mates. Players compete in single-elimination brackets, with each round leading to a best-of-five Finals. In the finals, the winner will receive the Sony PC Player award and be crowned the world's best Rocket League driver. However, the final winner will not be the best driver. This is because the goal of Rocket League is not simply to be the champion, but to be the very best. With these awards, players can compete against their friends in the fastest time and put their skills to the test. Released

for PS4, XB1, and PC, Rocket League is Psyonix's fan-favorite multiplayer rocket car soccer game. Psyonix constantly updates Rocket League to add new content, DLC characters, and features with new seasons at regular intervals. There is a new free update coming soon to the season three content, which will include new cars, functionality enhancements, new arena environments, and an entirely new map. During the weekly Wednesday events, new Community Plays will be released in the form of arenas, and the Rocket League Community will vote on which one will receive a prize. The further away from the front page the votes are placed the more likely the arena is to win, and that arena could be the one that's released in the next free update. At Psyonix, we are excited to bring Rocket League to you! Rocket League is the ultimate hybrid of

sports and action-driving. Set in a futuristic world, players can power up with supercharged engines, hurl soccer balls at their opponents, and control the rocket-powered vehicles as they storm down the field and battle it out at breakneck speeds! A single player has to face off against the computer in online mode. 5ec8ef588b
