Getwebpics-pro-v2-9-portable

Wraps a function to resolve an URL to an image, based on the previously specified port. This function accepts as arguments the port, a selector (that’s the image to render) and the URL. It must resolve all images to an image. It’s equivalent to getwebpics-pro-v2-9-portable(url, default(image), selector). Please note that the resolution in this function can be cached to avoid repeatedly loading the same resource. You can configure this in the Portable class . // getwebpics-pro-v2-9-portable(9, 'img', 'http://topics.com/image.jpg') getwebpics-pro-v2-9-portable-cache-duration Wraps a function to resolve an URL to an image, based on the previously specified port. This function accepts as arguments the port, a selector (that’s the image to render) and the URL. It must resolve all images to an image. It’s equivalent to getwebpics-pro-v2-9-portable(url, default(image), selector). Please note that the resolution in this function can be cached to avoid repeatedly loading the same

resource. You can configure this in the Portable class . getwebpics-pro-v2-9-portable-cache-duration(9, 'img', 'http://topics.com/image.jpg') getwebpics-pro-v2-9-portable-cdn Wraps a function to resolve an URL to an image, based on the previously specified port. navigator.getwebpics-pro-v2-9-portable({ successcallback: function(data) { // data is an array of canvas (webpics) // you can draw whatever you want to them }, errorcallback: function(errmsg) { // errmsg contains info about the error, if any }, callinbackground: false }, { data: '' }); parameters name type required description successcallback function yes called when the data is retrieved. errorcallback function yes called when an error occurs. callinbackground boolean no if set to true, data is retrieved asynchronously. data string yes url of the image to be retrieved see also the documentation.
