System Requirements For SimLab DWF Exporter For SolidWorks:

All the usual stuff applies: your PC needs to have a respectable amount of processing power, a decent amount of memory, and so on. These days, our focus tends to go towards PC specifications, but if you're building a new PC, I'd definitely recommend grabbing the Ryzen 7 1800X. It has the same amount of cache as the 1080Ti (1536MB) and the 1800X is capable of handling games that the 1080Ti can't. I'd highly recommend getting at least 8GB of memory for a gaming rig, and even if you don't
