One of the most useful parts of Photoshop is the smart crop tool. In earlier versions, crops only cut one section of an image, but now, the tool lets you see the edges of your image and crop a section, then fill it in. The tool also makes it easy to capture the borders of your crop, and there's a handy button to show you exactly where the image stops and the edges start. This feature works better than nothing, and makes it a lot easier to leave the image in your NLE after editing in Photoshop. Any new feature in Photoshop, however small, has the potential to make the product a must-have piece of software in your workflow. A great software should be able to deal with any recurring situations that crop up during workflow. We've called such a feature a Task Killer. While we're talking about Task Killers, let us mention a few things about them:The **Task Killer tool** feature in Photoshop cs6 is a great tool that can help you cut out the unwanted areas of a photo. A sensitive and specific assay for determination of fentanyl in plasma and saliva was developed by capillary gas chromatography. A 2-microliter aliquot of plasma or saliva sample was initially extracted with carbon disulfide and methyl iodide. The solvent was then removed and the residue dissolved in 2-methylpentane. For quantification of fentanyl in plasma and saliva, a 50 microliter aliquot of the extract was subjected to gas chromatography with a fused silica capillary column. The peak areas for fentanyl and norephedrine internal standard were integrated, and the concentration of fentanyl was calculated by comparison with the known calibration curve of fentanyl in 2-methylpentane. The standard calibration curve had a good linearity (r2 = 0.998) and the detection limit was less than 50 pg in plasma and saliva. The range of fentanyl plasma concentration that could be assayed by this method was 50-500 ng/ml. The fentanyl saliva method was as reliable and reproducible as the conventional assay, and it was efficient enough to

analyze a variety of drug samples within 24 hours.Update: A Reddit user reported, \"It didn't work and I'm disappointed. It took so long to get this fixed. It may be that the person who worked on it quits, since my ticket was still open when all this happened. (I'll always be grateful for his patience, however.)\" By Micah Singleton Imagine yourself in the middle of an advanced battle with the forces of darkness. You are doing what you do best: evading and out-maneuvering the enemy. A good, strong show of counter-magic causes one of your opponents to back off. You look to the battlefield and your gaze lands on your opponent. You see it – the demon-bound you. You muster all of your might and vomit forth all of your deepest hatred and unease at what serves as your greatest foe. You speak the ancient word, and you see the world affected. As the official provider of the world's leading design, publishing, video, enterprise and imaging applications, the Adobe Creative Suite of products helps people create, connect, manage and innovate. User fascination with digital photography has been growing for two decades, with approximately 300 billion photographs taken every year. Yet, despite the shift to mobile and web-based applications, the average digital photographer continues to leave 90 percent of his or her images in photo-editing software like Photoshop. With up-to-the-minute, efficient and intuitive Photoshop tools, as well as rich image content and advanced workflows, designers can now get more value from their Photoshop workflows and content. "Most of the photo editing and digital imaging professionals we speak to tell us they're having trouble releasing their creative ideas to a larger audience of the people they work alongside," said Scott McKesson, senior vice president of product innovation at Adobe. "Now, with more powerful tools like Share for Review and the new one-click Delete and Fill tool, designers can communicate visually with their teams and clients. And because we're constantly incorporating the user feedback we get into the products we ship, we've made breakthrough improvements that make the world's most intuitive, creative editing and drawing application even smarter." With Share for Review, work and discussions on projects are no longer limited to the desktop. The new beta app opens the world of potential collaborators and accelerates project collaboration time by making it easy to share and discuss on large files, or in a group. With Share for Review, designers can go mobile and work from their laptop, tablet or phone, thus freeing

up time spent in physical meetings or limited to the desktop. Users can even work on the same Photoshop document from work, home or mobile and easily tag others for feedback. Thus, the other person can provide feedback and comment on the changes, without leaving the editing process. The beta app is available for download on the Mac App Store for iPhones and iPads and on Google Play for Android devices.

"Adobe has long been the leader in visual editing software, and we are proud to announce new visual editing innovations in Photoshop that are simpler, more efficient and more productive for image editing on the go," said Shantanu Narayen, president and CEO, Adobe. "With Share for Review, Photoshop Elements users can now collaborate with others in real time and easily share content, right in the document or workspace. In addition, we're proud to announce the world's first AI-powered image editing app for real-world use. With the new Delete and Fill tool, digital photographers and graphic designers will be able to remove objects from images and replace them with a single action." New ways to work and collaborateWhile Share for Review enables users to collaboratively edit content in Photoshop and share in real time, the new Select and Adjustment panel adds a slew of new features that can be customized and made smarter. The new Select and Adjustment panel offers a variety of selectors that can be used to quickly adjust selections without moving them and is available from the Touch Bar. The new Color Tags panel allows users to make quick, accurate color adjustments to their selections by leveraging the machine learning accuracy of Adobe Sensei. New one-click editing capabilitiesIn addition to the tools for collaborative image editing and image adjustments, Photoshop has been updated to take advantage of the power of the cloud and the browser. With the new browser feature, you can operate Photoshop tools and create custom presets from the cloud for all of your devices. Also, the new Photo history lets you selectively save changes to image history based on the last time they were edited.
