The goal of miamidesktop.com is to share some best apps for your Android mobile phones, tablets and other gadgets, and give you some cool tips about technology in the process. There are tons of cool apps being released to Android regularly. In this article, we will take a look at some of the latest apps that deserve to be on your homescreen. What are the app advantages? iPad has come to dominate tablet markets over the past year. It's not that Apple's other products aren't good, and a lot of people may agree they deserve to be #1. But there is a fact we have to face: With iPad dominating the tablet market, we might be seeing a future where iPods just become the "next big thing." After all, it's been close to ten years since the iPod first hit the scene, and most of those ten years have been dominated by iPhone and iPad. I'm not saying the iPod will disappear; I'm just

What's New In?

Prompt iPod Backup is a free and easy-to-use application that allows you to copy music, videos and pictures from your iPod to your computer, making it even easier to listen to and view your favorite tunes. Once you have copied your media files to your computer, you can either transfer them to iTunes or upload them to your iPod. 2. Copy to a computer Now that your media files have been transferred to your computer, you can copy them directly to an iPod or the iTunes library using the options provided by the software. The software also provides a handy Renaming Rule system that will automatically move copied files to sub-folders so that you can keep your media organized. 3. Transfer to an iPod With your media files on the computer, you can now transfer them to your iPod and enjoy them without the limitations of iTunes. 4. Transfer to iTunes Once the files have been copied to your computer and you are ready to add them to iTunes, you will have to make sure you are logged in with the same Apple ID you used when you originally transferred the files to the computer. To transfer the files to iTunes, simply drag and drop the files from the folder to the iTunes window and the files will be transferred to your library. 5. Preview, Delete, Edit, Rename, Play Once the files have been transferred to the library, you can preview them, remove them if necessary, edit their name, play them or delete them. Your copy of iTunes comes with all the music you own on your iPod. If you want to transfer music from your iPod to iTunes, simply drag and drop your music files to the main window. 6. Play Your music files are now in your library. Use the playback buttons to listen to the music as you see fit. 7. Copy to iTunes Now you can transfer your music to your computer. Once again, you must be logged in with the same Apple ID that you used when you

originally transferred the files to the computer. 8. iTunes With your music files on your computer, you can now transfer them to your iPod. To do this, simply drag and drop your music files to the iTunes window. 9. Play Your music files are now in your library. Use the playback buttons to listen to the music as you see fit. 10. Export to iTunes Now that your music is in the iTunes library, you can transfer it back to your iPod with ease. Just drag and drop your music files into the iTunes window.
