The same holds true for those who want to change the appearance of their site or create their own logo. Some people are so concerned about light leaks that they pay hundreds of dollars for the latest versions or even if it's often just a matter of putting on a new pair of glasses. Adobe Photoshop is a strong contender even today. And as time goes by, its capability and features increase, so as to keep pace with the times. Adobe again managed to fulfill the desire for a new version, hoping to upgrade it rather than merely tweak the existing edition. This time around, new features shouldn't have a long wait. Even if the interface was Top Ten tonight, it would've been a tie for being a heavy user. That's my only complaint: they never used you as a guinea pig for a new version. They always have all the juicy stuff for a major release. Adobe Creative Suite is one of the most powerful software along with other brands. Users are able to edit and work with a high-level of quality. However, this not a marketing strategy and try to promote the latest version of Photoshop, but only the standard of the Photoshop. Photoshop is still the most powerful tool in the industry to effectively create quality designs. This means that Photoshop still has a strong position in the market.
