Well this is a pretty good feature! I hope its a permanent fixture on an active PS CC subscription. This allows PS On Demand users to share their own workloads seamlessly with PS On Demand creators (ie. A webmaster’s work, downloaded as a PSD). It’s a nice addition to the CC subscription, however the only drawback I see is that you need to give your CC on demand account a “full” web license key to be able to share your own workload. You can still upload your own work to your CC account, but its nice to have a seamless workflow with your CC friends. After using Lightroom 5 with a handful of my own photos, I can say that it is much faster than Lightroom 4.5 for the most part. I think the biggest advantage is that it now loads faster, and small thumbnails are displayed even at the beginning of catalogs. With the latter enabled, you can even switch back and forth between thumbnails and catalogs without an issue. Editorial nirvana in a compact package; Sony introduces a new line of Cyber-shot cameras equipped with its new XZ1E. I’ll run the camera through its paces for the first time, and see if it lives up to its billing as a budget pro-level model. A new standard

model in the Sony XZ line, the XZ1E is the first camera in the series to feature an X-Processor engine with in-body image stabilization. It's also equipped with a 20-megapixel Exmor RS APS-C (X-Trans CMOS III) sensor with 16.0 megapixel effective (APS-C) resolution and phase-detection autofocus for lower light photos. Other features are built-in Wi-Fi with NFC (near-field communications) connectivity, an electronic viewfinder with an eye sensor, a built-in L-series lens (with lenses that can be exchanged for others), NFC connectivity, 4K (UHD) video footage, which can be sent to your smartphone on a Wi-Fi network, OLED Tru-Finder screen, RAW capture (12-bit DCI) ISO of up to 102,400, 4K (UHD) video footage, which can be sent to your smartphone on a Wi-Fi network, OLED Tru-Finder screen, RAW capture (12-bit DCI) ISO of up to 102,400, NFC connectivity, Viewfinder mode capable of capturing high quality 4K footage, 2.7 inch screen LCD, Viewfinder mode capable of capturing high quality 4K footage, 2.

You can do fine-tuning by clicking the options that you would like to apply. For example, if you have a rough surface, you can adjust the colors and sharpen the pixels.
